Definition:-spin and orbital motion of the electron are source of magnetic moment

Magnetic moment तब generate होता है जब electron में spin and motion होता है

INTRODUCTION

- Coherent Anti-Stokes Raman Spectroscopy, also called Coherent Anti-stokes Raman Scattering Spectroscopy (CARS) is a form of Spectroscopy used primarily in Chemistry, Physics and related fields.
- It is sensitive to the same vibrational signatures of molecules as seen in Raman Spectroscopy typically the nuclear vibration of chemical bond.

IT was proposed by H.bethe (1929)
and von vleck 1932

Important point of CFT

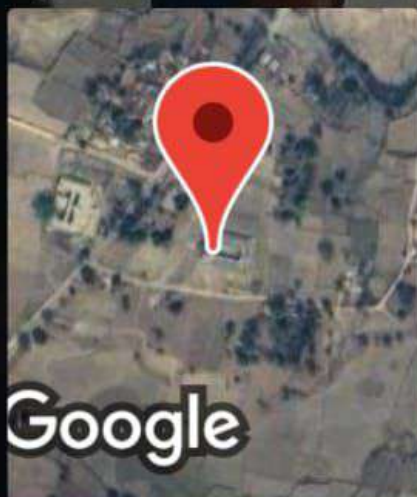

- This theory considered the metal-ligand bond is purely ionic.
- The electrostatic interactions between metal ion and ligand.
- The ligand is anion metal atom is cation.
